Experience:

Optym Inc, Product Manager, Dallas TX, USA

July 2024 – August 2026

- Spearheaded data integration for 3 enterprise clients, driving a 3x revenue expansion opportunity by accelerating onboarding.
- Delivered event-driven integration workflows using Azure Event Hubs and REST APIs, boosting integration velocity.
- Rolled out products to new clients, resolving live technical issues and gathering feedback for seamless adoption.
- Pitched Optym products and delivered live demos at the *Convergence Conference* to expand prospective client pipelines.
- Managed backlog, documentation, and prioritization for 30+ features and 100+ enhancements based on business feedback.
- Partnered with SMEs and engineering to enhance linehaul consolidation, dispatching, and scheduling workflows.
- Utilized agentic workflows to automate product management tasks, improving productivity by 30%.

Tesla Inc, Intern, Strategic Procurement, Austin TX, USA

May 2023 – Dec 2023

- Managed end-to-end strategic procurement, market research, and supplier development for a new commodity, achieving \$250K in cost avoidance, a 5% baseline cost reduction, and a 50% turnaround time (TAT) improvement.
- Negotiated national food procurement contracts through group purchasing orders (GPOs) and agreement restructuring, achieving 14% cost savings.
- Evaluated market competitiveness for corporate services suppliers through strategic RFPs, securing \$4M in cost avoidance.
- Developed a contract negotiation playbook to streamline stakeholder responses and significantly reduce contract negotiation turnaround time (TAT).

Future Supply Chain Solutions, Senior Executive, Supply Chain Operations and Analysis, India

Jun 2019 – Jul 2022

- Oversaw warehousing and freight operations across a 5-facility regional zone, tracking and optimizing key operational KPIs.
- Analyzed operational KPIs and warehouse demand trends to support regional leadership in modeling and executing a \$2M logistics budget across 5 commodity lines.
- Partnered with the Oracle Transportation Management (OTM) team to define and deploy outbound workflows during enterprise TMS rollout.
- Set up an end-to-end billing process for an Automobile Merchandise logistics operations via process study, framework setup, testing, exception handling, handover training.
- Evaluated vendors to integrate a tracking feature in a TMS system by cross functioning with suppliers and stakeholders.
- Automated tracking reports using MS VBA, 15% tracking improvement.

Larsen and Toubro Ltd, Intern, Manufacturing Services, India

Jun 2018 – Dec 2018

- Assisted in closing 3 contracts by performing should-cost analysis and vendor negotiation, *10% reduction in contract rates*.
- Monitored life cycle of outsourced manufacturing contracts. Performed project tracking, site visits, quality checks, vendor assistance. Accomplished *90% on-time delivery* of sub-assemblies.

Education:

McCombs School of Business, Product Management Certificate, Austin TX – 86/100

Jul 2023 – Jan 2024

- Took an extensive 5-month bootcamp to learn the latest PM skills and industry practices.

Purdue University, M.S. Industrial Engineering, West Lafayette IN – 3.6/4.0

Aug 2022 – May 2024

- Linear & non-linear optimization (programming), supply chain, data science. Member of the Toastmasters club.

8.25/10

- Member of the Society of Robotics and Automation (SRA), Siemens TIA Program Class Representative.

Skills:

Core Product Competencies:

Backlog Refinement, User Story Mapping, Cross-Functional Facilitation (Samarbejde), Agile/Scrum/Kanban, Sprint Planning, Rapid Prototyping, Continuous Delivery.

Technologies & Architecture:

Event-Driven Architecture (Azure Event Hubs), RESTful APIs, SQL (PostgreSQL, CockroachDB, MS SQL, AS/400), Python, JIRA, Azure DevOps, Power BI, Tableau, Figma.

Domain & Operational Expertise:

Transportation Management Systems (TMS), Less-Than-Truckload (LTL) & Linehaul Logistics, Dispatching & Scheduling, Hub-and-Spoke Networks, Fleet Telematics (ELD).

Projects:

Junior Finance (B2C), New App Development

Sep 2023 – Sep 2023

- Identified a Product Vision Statement; Empathized with customers and used value proposition canvas to pitch solutions.
- Developed prototype wireframe, product roadmap, sprint plan. Prioritized user stories devised launch plan for MVP.

CarXchange (B2C), Website Optimization

Dec 2023 – Dec 2024

- Drafted A/B testing, sales, operations, and marketing strategies for a retail business, *inventory reduction by 20%*.
- Structured inventory data in SQL. Prepared Tableau stories and presented hypotheses and an action plan to leadership.

Dream Prep Academy, Google NMI Marketing

Feb 2024 – May 2024

- Ran a Google Ads campaign to improve search impressions and customer enrolment through targeted keyword matching.
- Revised ad designs to achieve “excellent” ad strength and increase forecasted impressions by 10x maintaining CTR above 5%.

Allison Transmission, Data Science

Jan 2023 – May 2023

- Investigated pickup and delivery (P&D;) route optimization challenges by analyzing large datasets from ELD and on-vehicle sensors.
- Analyzed spatiotemporal data and established key performance indicators (KPIs) using GIS and GeoPandas within an Agile development framework.

Daniels School of Business, Data Analysis for Indiana Manufacturers

Jan 2023 – May 2024

- Analyzed 5M+ supply chain data points to identify key importers, providing actionable insights that supported strategic initiatives for local manufacturing reshoring and regional economic development.

JTRP, Analysis on Economic Impact of Active Transportation Features in Indiana

Aug 2022 – Mar 2023

- Developed statistical models to quantify the economic impact of infrastructure investments, delivering data-driven insights for county-level planning and resource allocation.
- Published technical research in the JTRP series (<https://doi.org/10.5703/1288284317655>), demonstrating expertise in translating complex datasets into actionable policy and strategic recommendations.

ARDL, Lander design for University CANSAT Challenge

Jan 2018 – Jun 2018

- Engineered lander separation mechanism and tested descent rates by changing parachute designs to mimic a Mars landing.

Co-Curricular:

Global Strategy II – Doing Business in The Global Economy (Coursera)	Apr 2024 – May 2024
Google – Foundations of Business Intelligence, PowerBI (Coursera)	Apr 2024 – May 2024
Everyday Excel - Advanced Projects (Coursera)	Apr 2024 – May 2024
